

Claim boundary cheat sheet

A visual reminder of what the result supports, where it is conditional, and what it does not claim.

OK

Supported

All models are faithful under C0; LLaVA shows C3/C4 paired shifts.

IF

Bounded

The shift changes with wording, format, prompt factor, and colour pair.

NO

Not claimed

The evidence does not show general text-over-vision behaviour.

Good for Discussion: strong result, honest border.
